MANUFACTURER'S DECLARATION OF INCORPORATION

In accordance with the EU Machinery Directive **2006/42/CE**, it is hereby declared that the 'partly completed machinery' listed below is in conformity with the provisions of the Essential Safety Requirements of the said Directive, that its relevant technical documentation complies with Annex **VII B** and that these 'partly completed machinery' also complies with the following directives and sector-specific standards.

Description of "almost machines" products:
Traction units for lifts and hoists in "gearless" versions, named: **VERONA**

Manufacturer:
Orange1 Electric Motors S.p.A. – Via Umbria, 11 – 20056 Grezzago (MI) – Italy, under the brand Orange1 LIFT.

Harmonised Reference Standards:
EN81-20:2020/EN81-50:2020 Safety rules for the construction and installation of lifts.
EN 12015:2020 Electromagnetic compatibility for lifts. Emission.
EN 12016:2013 Electromagnetic compatibility for lifts. Immunity.
EN 60034-1:2011 Rotating electrical machines excluding other IEC standards.

Reference Directives:
2014/33/EU Directive on Lifts and Safety Components and its predecessor 95/16/EC, amended according to Art. 24 of Directive 2006/42/EC.
2006/42/EC, Machinery Directive; in particular: 1.1.1, 1.1.2, 1.1.3, 1.1.5, 1.3.2, 1.3.4, 1.3.7, 1.3.8, 1.4.1, 1.4.2, 1.5.1, 1.5.6, 1.7.3, 1.7.4, 4.1.2.3, 4.1.2.4, 6.1.1
2014/30/EU Electromagnetic Compatibility Directive

The manufacturer undertakes to provide the national authorities, upon reasoned request, with information relevant to the "partly completed machinery" in question. The person authorised to compile the relevant technical documentation is the Legal Representative.

The manufacturer also declares that the "partly completed machinery" described above is only intended for incorporation into other machinery (complex assembly) and must not be put into service until the final machinery into which it will be incorporated has been declared in conformity with Directive 2006/42/EC, 2014/30/EU and the corresponding standards and provisions.
In particular, the analysis of risks with regard to protective equipment against accidents, the slipping/loosening of ropes/chains from pulleys/pinions and the introduction of foreign bodies between ropes/chains and pulleys/pinions.

Grezzago (MI), Via Umbria 11
